# PRESS RELEASE

## Metabo Introduces the 18V Brushless Rotary Hammer with Integrated Dust Collection

*The dustless solution for drilling into masonry materials*

**November 17, 2017 – West Chester, PA –**

Metabo Corporation, a leading international manufacturer of industrial grade cordless and cored hand-held power tools and accessories, introduces the 18V Brushless Rotary Hammer with Integrated Dust Collection (600211900), made in Germany.

“The 18V Brushless Rotary Hammer with Integrated Dust Collection and HEPA filter (KHA 18 LTX BL 24 Quick + ISA 18 LTX) is the perfect solution to a dust free work environment, and ideal for electricians or any trades person drilling overhead.” “Without a tool like this, the dust created by drilling a single hole would drop onto the operator and go airborne.” “This rotary hammer not only protects the user but saves valuable time cleaning up the workspace and makes the workspace safer.” “Thanks to the creation of objective data, this system also offers compliance with the latest OSHA silica focus,” said Antoine Derché, Metabo’s Director of Product and Marketing.

This extremely fast, lightweight and compact cordless rotary hammer with integrated dust collection has a no-load speed of 1,200 rpm, 2.2 joules and an impact rate of 4,500 blows per minute. It is also designed to be the fastest hammer in its class for anchoring applications (3/10" to 5/8"). The rotary hammer has vario-constamatic (VC) full-wave electronics which allow the tool to maintain a practically consistent speed under any load. This machine is a super multitasking combination hammer for hammer drilling, drilling without impact and even chiseling.

The KHA 18 LTX BL 24 Quick + ISA 18 LTX has a 6-1/4" dustless drill length and 5/8" capacity in concrete (without the dust collector, it has a 1" capacity in concrete). When the rotary hammer is combined with Metabo SDS-Plus Pro 4 Carbide drill bits, it is the fastest anchoring system available for 3/16" to 5/8" holes!

**FOR IMMEDIATE RELEASE**

Metabo's Ultra-M battery platform provides high performance power, efficient charging, optimum energy use and long service life. When using the patented 7.0 Amp hour LiHD battery, the cordless rotary hammer can drill over 240 1/4" wide x 1-5/8" deep holes in concrete or over 100 3/8" wide x 2-3/8" deep holes in concrete on one charge. Without the ISA 18 LTX dust collector, the cordless rotary hammer can drill over 270 1/4" wide x 1-5/8" deep holes in concrete or over 115 3/8" wide x 2-3/8" deep holes in concrete on one charge.

As always, Metabo is a leader in safety and maximizing tool efficiency and longevity. Key features of the KHA 18 LTX BL 24 Quick + ISA 18 LTX include a brushless motor, which means dependability, longer tool life and longer runtime. This rotary hammer includes a safety clutch, which protects the user from kick-back if the bit gets stuck in the material being worked. The MVT (Metabo Vibration Technology) vibration dampening system and side-handle provides relief and helps protect the user from damaging vibrations. The quick SDS+ 3-jaw chuck allows for fast bit changes with less downtime and the heavy-duty aluminum gearbox protects the tool from everyday use and dissipates heat build-up quickly. These features add up to a compact, powerful tool that holds up to the rigors of everyday use and makes the job easier and even more importantly – safer!

**ABOUT METABO:** Engineered in Germany, Metabo's premium line of power tools are designed specifically for professional users to provide the highest level of safety, reliability, and performance.

Metabo manufactures both corded and cordless power tools, as well as a full line of abrasives and accessories for metalworking, concrete and many other industrial and construction applications. Our extensive line of tools includes angle grinders, die grinders, drills, rotary hammers and dustless systems.

Also, the Metabo Ultra-M LiHD battery technology offers users the mobility and power for the most demanding industrial applications.
