PROFESSIONAL POWER TOOL SOLUTIONS

PRESS RELEASE

Metabo Introduces Brushless 18V High Torque Impact Wrench and Driver

For fastening / driving bolts and screws.

November 2018 – West Chester, PA – Metabo Corporation, a leading international manufacturer of professional grade cordless and corded hand-held power tools and accessories, announces two new tools; 18V Impact Driver (SSD 18 LTX 200 BL) and 18V High Torque Impact Wrench (SSW 18 LTX 300 BL).

“We are excited about these strong additions to our continuously expanding line of cordless tools. These two brushless tools are more efficient, compact and have increased torque over previous models, allowing the user to work longer and more effectively when fastening or drilling. Most importantly, our users will notice the incredible increase in working speed, making these impact fastest in their class”, says Antoine Derché, Metabo’s Director of Product and Marketing.

The 18V Compact Impact Wrench (SSW 18 LTX 300 BL) has a no-load speed of 2,650 rpm, 221 ft lbs. of torque and 3,750 BPM. While the 18V Impact Driver (SSD 18 LTX 200 BL) has a no-load speed of 2,900 rpm, 1,700 inch lbs. of torque and 4,000 BPM. Both have 12 speeds/torque levels that allow for a wide range of applications.

The 18V Impact Wrench and Driver are extremely fast and have an industry leading power to size ratio, reducing worker fatigue and speeding up work. These tools include powerful brushless motors, increasing the number of screws or bolts that can be processed in less time. The Cordless Impact Wrench and Driver have a unique feature called Automatic Power Shift or APS, which supports working with self-tapping screws; automatic torque reduction after drilling to prevent stripping. This feature gives a lot of control to the users while maximizing working speed and efficiency. The tools also include electronic overload protection to keep the motor from overheating, prolonging the tools life. Additional features include a belt hook that can be placed on the left or right of the tool and a LED light for illuminating work.
