PROFESSIONAL POWER TOOL SOLUTIONS

PRESS RELEASE

Metabo will be at Fabtech 2017 in Chicago, IL.

Highlighting the latest in technology, safety and problem solving tools

September 12, 2017 – West Chester, PA

– Metabo Corporation, a leading international manufacturer of professional grade cordless and corded hand-held power tools and accessories announces they will be in booth B31073 at Fabtech 2017 in Chicago, IL. Fabtech is the ideal place to go if you're looking to discover the latest in fabrication technology, welding, metal forming and finishing.

“We’re thrilled to be back again at Fabtech this year after getting so much positive feedback on our cordless fabrication shop tool line-up last year”. “We’re looking forward to an exciting show this year!” “Our focus will be in line with our strategy”. “First emphasizing safety and the unique features that only Metabo offers”. “Second, showing our cordless capabilities and realizing our vision of the cordless metal fab-shop”. “And third, of course showcasing the quality and performance of our Metalworking solutions that distinguish Metabo from the rest of the promo-driven brands”, said Antoine Derché, Metabo’s Director of Product and Marketing.

Metabo will be featuring products from their extensive line of metal working tools and highlighting their complete line of cutting and grinding wheels, and their brand-new line of flap discs. They will also be presenting their multi-bay 8 pack charger, the industry’s first charger that charges 8 batteries at the same time, making sure industrial end-users and high output shops are always ready to perform. Their line of flathead grinders and INOX stainless-steel finishing tools will also be on hand. Flathead angle grinders allow users to get into tight spaces that are too small for traditional angle grinders.

FOR IMMEDIATE RELEASE

Metabo's booth will also feature demonstrations of their compact beveling tools which are designed for internal and external chamfering. The larger class of beveling tools offer unlimited bevel angle customization, making welding prep easier, faster and more cost effective all along the process.

Safety is also an integral part of Metabo's display this year. Metabo will be highlighting tools with safety features such as the WEPBA 17-150 Quick RT DS, 6" Electronic Angle Grinder that comes with a mechanical safety clutch, paddle switch, mechanical safety brake, auto-balance and drop secure (tether attachment point) feature.

Make sure you stop by Metabo's booth to learn more about these exciting, industry leading technologies. And, don't miss out on a chance to win a free Metabo tool.
