# PRESS RELEASE

## Metabo's MHE 5 SDS-Max Chipping Hammer *High Performing SDS-Max Chipping Hammer*

### **August 2022 – West Chester, PA**

Metabo Corporation, a leading German international manufacturer of professional-grade cordless and corded hand-held power tools and accessories in the US, introduces their new SDS-Max Chipping Hammer, the MHE 5.

"This high performing SDS-Max Chipping Hammer, the MHE 5 ([600148620](#)) is ideal for scaling, tile and mastic removal, chiseling, demolition and breakthrough applications, and offers an excellent price to performance ratio. The hammer features active vibration reduction and a lock-on switch for increased ergonomic and comfortable operation. This tool rounds out Metabo's offering of high-performance rotary hammers and breakers" said Terry Tuerk, Metabo's Senior Product Manager

The MHE 5 has a maximum impact rate of 3,000 BPM with 7.1 joules and 9.6 Amps. The SDS-Max Chipping Hammer features Vario-Constamatic Full-wave Electronics, which maintains the number of blows under load for fast chiseling. The "VC" electronics also allows the operator to control the impact rate and energy for more precise chisel placement or to protect adjacent materials from damage, for example, when a damaged tile requires removal for replacement. Other features of "VC" electronics are soft start for precise chisel placement, and power interruption protection that prevents the tool from running if the switch is locked-on when plugged in.

**FOR IMMEDIATE RELEASE**

In addition, there are two LEDs at the base of the handle; one glows green, so the operator can see immediately when the tool is energized, the second glows red, if the tool is plugged in and the switch is in the locked-on position. The red LED also serves as a service reminder, slowly flashing when approximately 8 hours of carbon brush life remain.

The MHE 5 includes the tool, a 360-degree D-handle, bit lubrication and a handy wiper, packaged in a heavy-duty plastic case.

Metabo recommends pairing the MHE 5 with the ESA Max Extraction Set (623271000) and a HEPA vacuum, like Metabo's ASR 35 Auto-clean HEPA Vacuum (602057800) for compliance with OSHA Silica regulations.

**Metabo. Safety, Reliability, Performance. When It Really Counts**
