## Metabo Introduces 3 NEW Dimmable Cordless Site Lights

*Versatile cordless site lighting for a variety of light requirements and work*

### November 2022 – West Chester, PA

Metabo Corporation, a leading German international manufacturer of professional-grade cordless and corded hand-held power tools and accessories in the US, introduces three NEW Dimmable 12-18V Cordless Site Lights.

“We are excited to add three NEW site lights to our cordless line. Each includes a variety of features and functions for a wide range of jobsite work”, said Joseph Masters, Metabo’s Cordless Product Manager.

Metabo’s three dimmable cordless site lights include the **BSA 12-18 LED 2000** ([601504850](#) Bare), the **BSA 18 LED 4000** ([601505850](#) Bare) and **BSA 18 LED 10000** ([601506420](#) Bare/Hybrid). The lights all feature IP54 protection against water and dust, including grinder spark resistant lenses and rubberized grips for easier handling.

The **BSA 12-18 LED 2000** has 350 to 2000 variable lumens. The light has a focused COB LED for inspection work and can rotate 360 degrees. The **BSA 12-18 LED 2000** includes a magnetic base and a hook for hanging.

The **BSA 18 LED 4000** has a range of 700-4000 lumens and the **BSA 18 LED 10000** includes the widest range of variable lumens from 1000-10000. The **BSA 18 LED 10000** also functions as a hybrid, it can be plugged in or used cordless. Both lights produce a wide beam of light, reducing shadows. They have magnetic bases, keyholes and can rotate 270 degrees, enabling the end-user to place the light exactly where it’s needed. In addition, each light includes a USB port for charging a phone or other compatible device when an outlet or extension cord is nowhere in sight.

These three site lights are useful for a wide variety of users and applications. Anyone from a plumber, painter, or contractor to utility/construction workers.
