PRESS RELEASE

Metabo's 18V 1-1/8" SDS-Plus Combination Hammer
Safer Drilling with Enhanced Kick-back Control.

April 2023— Metabo, a leading German international manufacturer of professional-grade cordless and corded hand-held power tools and accessories in the US, introduces their new 18V 1-1/8" SDS-Plus Combination Hammer.

"We are excited to introduce the KH 18 LTX BL 28 Q, 18V 1-1/8" SDS-Plus Combination Hammer. This hammer is meant for drilling into masonry, concrete and stone for anchoring. It's also ideal for through-hole applications, doweling, chiseling and demolition. The combination hammer includes

enhanced kick-back control for safer drilling, said Joseph Masters, Metabo's Senior Product Manager.

There are two versions available, bare tool (KH 18 LTX BL 28 Q - 601715840) and bare with ISA 28 dust extractor (KH 18 LTX BL 28 Q ISA 28 – 601715900). The KH 18 LTX BL 28 Q when combined with the ISA 28, allows for dust-free drilling in concrete, stone and masonry.

The KH 18 LTX BL 28 Q has a 3-mode operation for drilling with impact, drilling and chiseling. The combination hammer has a maximum impact rate of 4,470 BPM with 3 joules. Its no-load speed is 0-1,000 rpm and it can hammer drill in masonry with core bits up to 3-1/4" and drill in concrete up to 1-1/8".

The 18V 1-1/8" SDS-Plus Combination Hammer features a brushless motor and kick-back control with gyroscopic sensor, it measures the bits rotation and stops the tool if it gets stuck during operation. The KH 18 LTX BL 28 has Vario-Constamatic Full-wave Electronics, which allows the tool to maintain the number of blows and rpm under load for faster drilling. In

addition, this combination hammer includes a power reduction feature that reduces material fragmentation when breaking through and provides increased precision when chiseling.

The KH 18 LTX BL 28 Q includes several safety features like Metabo's patented safety clutch system, which helps keep end-users safe when a bit jams.

It also includes Metabo's MVT anti-vibration system, decreasing hand and arm vibrations, reducing end-user fatigue, and protecting against long-term vibration-related disorders.

For additional comfort, there is a chiseling lock-on feature for extended use.

ABOUT METABO: Engineered in Germany, Metabo's premium line of power tools are designed specifically for professional users to provide the highest level of safety, reliability, and performance. Metabo manufactures both corded and cordless power tools, as well as a full line of abrasives and accessories for metalworking, concrete and many other industrial and construction applications. Our extensive line of tools includes angle grinders, die grinders, drills, rotary hammers and dustless systems. Also, the Metabo Ultra-M LiHD battery technology offers users the mobility and power for the most demanding industrial applications.
